

TITAN Response to BHRRC's invitation – APCC plant

TITAN Cement Egypt (TCE) confirms that due to a temporary incident at the Alexandria Portland Cement plant (APCC), on May 18, 2017, release of dust was caused. The incident was detected and brought under control very quickly.

TCE has an enduring commitment to environmental stewardship and to continuous improvement. During the past two years, significant investments and operational costs of more than EGP 310m have been allocated by TCE in both Alexandria and Beni Suef operations, following international sustainability and environmental standards and industry best practice. This on-going effort is contributing to the continuous reduction of the environmental footprint of the plants.
